PROFILE

TECHNICAL DESIGN

- Wooden inner frame
 - Spring system: nosag spring
 - Seat in polyurethane foam, "density" 37 kg/m³
 - Back in polyurethane foam, "density" 30 kg/m³
 - Standard foot: plastic tubular surface with matt chrome optics
- The data of "density" can vary in a range of +/-10%.

ASO/SOB 132

INFORMATION

- Choice of seat height 40, 43 or 46 cm. However seat height 46 cm is only possible with the tubular steel leg, the tapered steel leg and tapered foot oak (even sloping conical bases). Please specify on ordering.
- The range is only suitable for velour covers to a limited extent. The fell seams and piping can lead to lines in the pile.
- With modular systems, velour covers can lead to different pile alignments and therefore to different shine properties.
- There are more dividing seams in leather covers than in fabric covers. Detailed information about this can be found in the info section.
- Repeat and patterned fabrics cannot be processed with this range.
- Due to its design, this range has a casual upholstery that has a tendency to develop waviness in the surface of the upholstery, and therefore needs more careful maintenance.
- For ergonomic reasons, only the seat area of model ASS-PSZ – not the leg rest – is sprung. So if the leg rest is used as a seat it will feel much firmer.
